Ohio Honey Production Up 20 Percent

Ohio honey production for 2014 totaled 915 thousand pounds, up 20 percent from 2013. This estimate included honey from producers with 5 or more colonies. Nationally, Ohio ranked twenty-fourth in honey production in 2014. Ohio was ranked twenty-sixth in 2013. Yields from Ohio's 15,000 honey producing colonies averaged 61 pounds in 2014, compared with 45 pounds the previous year.

Ohio honey price averaged \$3.52 per pound, up 23 cents per pound from last year. Value of production totaled \$3.22 million, up 28 percent from 2013. Honey stocks were 256 thousand pounds, down 34 percent from 2013.

Nationally, honey production in 2014 from producers with five or more colonies totaled 178 million pounds, up 19 percent from 2013. There were 2.74 million colonies producing honey in 2014, up 4 percent from 2013. Yield per colony averaged 65.1 pounds, up 15 percent from the 56.6 pounds in 2013. Colonies which produced honey in more than one State were counted in each State where the honey was produced. Therefore, at the United States level yield per colony may be understated, but total production would not be impacted. Colonies were not included if honey was not harvested. Producer honey stocks were 41.2 million pounds on December 15, 2014, up 8 percent from a year earlier. Stocks held by producers exclude those held under the commodity loan program.

Honey prices increased to a record high during 2014 to 216.1 cents per pound, up 1 percent from 214.1 cents per pound in 2013. United States and State level prices reflect the portions of honey sold through cooperatives, private, and retail channels. Prices for each color class are derived by weighting the quantities sold for each marketing channel. Prices for the 2013 crop reflect honey sold in 2013 and 2014. Some 2013 crop honey was sold in 2014, which caused some revisions to the 2013 crop prices.
